COMpact 5200

Fully modular wall-mounted VoIP communications server with up to 20 channels to the service provider, 50 subscribers max. and 5 slots

- Suggested up to 50 subscribers
- Up to 32 VoIP channels simultaneously, of which 20 can be configured for external use
- Up to 20 system telephony subscriber (with digital phones out of the COMfortel® series) or 20 analogue subscribers
- Second Ethernet interface for the separation of data and VoIP
- Softphone (optional) for Windows, iOS and Android

Your advantages in detail

The fully modular COMpact 5200 combines all the functions of a large ICT system in a small space: it can be tailored to individual needs, just like our "big" communication servers, and it can integrate existing analogue and ISDN devices and manage the new cordless DECT systems smoothly for mobile coverage over huge areas.

The COMpact 5200 easily and securely meets the requirements of the home office and modern temporary workstations with optional soft clients for computers, tablets and smartphones. The cost-effective COMfortel SoftPhone for voice and chat is available at the entry level. Those who need more extensive functions and more intensive integration into business processes will find the optimal UCC solution with PBX Call Assist.

Above all, you can use it to take full advantage of Internet telephony – from easier administration to long-term cost savings! Last but not least!
